Contributions

The following document outlines the tasks that each team member contributed to or completed during the project, as well as their responsibilities.

Elliot:

-Elliot was responsible for the coding of the *payment* class and the *projectSimulation* class. He was also tasked with the completion of the GUI model as well as testing.

Andrew:

-Andrew was mainly responsible for bug fixing throughout the entire project. He also contributed to large parts of the *commandline* class and the *login* class.

Thomas:

-Thomas' main responsibility was to code the *commandline* class and the *propertySystems* class. He also coded the majority of the *propertyTax* class.

Callum:

-Callum was responsible for completing the *property* class. He also contributed largely to the code in the *commandline* class as well as testing.

Adam:

-Adam was responsible for the completion of the UML diagram and the CRC diagram. He also had the task of completing the surrounding documents relating to the project (contributions and instructions documents).

<u>Every team member was involved in the testing of the project.</u>

All team members agreed on their relative tasks/responsibilities and carried them out as outlined above.
